Disco Automotive Hardware

Distributor Supply Company

2016 Product Catalog

About Disco

Purchased in 1986, Disco Automotive Hardware started as a master distributor of automotive fasteners for the automotive after market. Disco is a family owned business that saw the need to manufacture as well as distribute a large selection of OEM and specialty fasteners. Over the last 30 years, Disco has evolved into a complete line of automotive products.

Our company goal:
Complete Customer Satisfaction with our Products and Service.

We service our customer's needs through our worldwide network of authorized Disco distributors and market through traditional channels of distribution. Selling only to authorized distributors, we offer three types of packaging: small "unit package" quantities, a one price "retail program" and in large "bulk quantities". In addition, we offer a variety of assortments and merchandising aids.

The Disco catalog is a complete reference for the automotive hardware industry. Our latest edition features OEM cross reference guides, actual size color photos and illustrations as well as complete specifications and dimensions.

Disco's management has over 250 years combined experience in selling and working with automotive hardware. We are committed to working closely with your sales staff to aide them in selling more products.

If you have any questions or concerns, please feel free to contact us.

From our President

We are very excited about this new catalog. Since our last catalog, we have more than tripled our product line. Please take a minute to go through this new catalog, you will be surprised at the new items that we now carry.

We are fast becoming a complete supplier to the fastener industry.

Check out our web site www.discoautomotive.com for even more information.

We appreciate your business.

Insert

Insert as you would any ordinary cotter pin. Hammer Lock pins have specially tapered parallel shanks for quick insertion.

Hit with Hammer

When hammer hits head of Hammer Lock pin, it forces the shorter shank down over the curved end of the longer shank, thus causing the lower ends of the shanks to spread apart. This simple operation locks the pin securely in place. No twisting or spreading of the shanks is necessary. It is all done automatically.

Twist to remove

To remove, insert any small tool in eye of Hammer Lock pin. Twist shorter shank to original position and remove.
