

#8012 Showroom Display

All the advantages of the MT with none of the floor space.

We know that as a retailer, your floor space is very important. That's why we developed the 8012 Showroom Display which requires only a few feet of wall space.

The Showroom Display uses actual samples of the parts, not just pictures. The display boards open like a book with the part information on the left and actual samples on the right. Now your customer can easily find what they are looking for.

This system also allows you to keep merchandise in an inventory controlled area, so you can prevent lost inventory.

Best of all, it's easy to instal and is expandable.
