

A collection of various types of metal fasteners, including bolts, nuts, washers, and screws, arranged in a grid-like pattern. The fasteners are shown in different sizes, colors (black, silver, and one white), and orientations. Some have hexagonal heads, while others have flat heads or specialized shapes. The background is white, and the fasteners are set against a light gray grid.

Rivets

Rivets Self Piercing (SPR)

For Aluminum and Steel bonding applications.

Used on Audi, BMW, Ford, Jaguar, Land Rover and Mercedes Benz.

Note: It is recommended to check with your OEM or OE vendor to verify requirements for each application. Each manufacturer has different requirements for sizes, locations, and number of rivets required. Do not install replacement SPR in original SPR holes. Blind Rivets may be installed in original SPR holes. Holes must first be reamed to OEM specifications.

Rivets

Rivets Multi Grip Pop Aluminum & Steel

The Multi-Grip rivet will serve in applications where solid, soft materials and thicknesses normally require several rivet sizes. Oversize, irregular or misaligned holes are automatically compensated for by self adjusting hole-filling capability. The mandrel head is retained in the rivet body, forming a tight, weather resistant seal.
